STEM program

Program Description

The bachelor of arts degree is designed for students who seek a broad education in biology. This degree is suitable preparation for a diverse range of careers including health science, science education and ecology-related fields.

Students can earn the BA in biology alone, or with one of four emphases: biodiversity, bioinformatics, education or health science.

Learning Outcomes

Students who complete any of the bachelor of arts in biology will be able to:

- Describe biological, chemical and physical principles as they relate to the natural world in writings and presentations to a diverse audience.
- Place scientific knowledge into an ethical context, including how biology can contribute to the resolution of ethical, social and environmental issues around the globe.
- Apply the methods of scientific inquiry, including observation, hypothesis testing, data collection and analysis for laboratory research.

Degree Requirements

For information on the general requirements for a degree, see Baccalaureate Degree Requirements under the Academic Policies and Information section of this catalog.

- 54 credit hours core coursework
- 12 additional credit hours in BIOL, CHEM or PHYS at the 2000+ level
 - or Courses specific to the selected emphasis
- Applicable University Global Citizenship Program hours, with accommodations for the biology BA
- Electives

Global Citizenship Program for Biology BA

Requirements are modified to allow MATH 1430 to satisfy both a requirement of the major and also the GCP 'Quantitative Literacy' requirement.

BA in Biology (66 hours)

The general degree offers the greatest flexibility, allowing students to select 12 hours of electives from any of our 2000+ level BIOL, CHEM or PHYS courses in addition to the 54 credits of core coursework in biology listed above. No more than four hours can be applied from independent research credits, including Independent Biology Research (BIOL 4700, 4710, 4720 and/or 4730) and Independent Chemistry Research (CHEM 4700, 4710, 4720 and/or 4730).

Emphasis in Biodiversity (69 hours)

The emphasis in biodiversity is designed for those students that have an interest in understanding the variety and biology of life forms on our planet, and how humans fit into global ecosystems. This emphasis is focused on applying fundamental principles of biology to ecological issues.

Emphasis-Specific Learning Outcomes

In addition to the general learning outcomes, students who complete the emphasis in biodiversity will be able to:

 Describe the global challenges in supporting biodiversity and conservation.

Required Courses for the Emphasis in Biodiversity

In addition to the 54 credit hours of core coursework in biology, the following courses are required for the emphasis in biodiversity:

- BIOL 2400 Zoology (3 hours)
- BIOL 2500 Botany (3 hours)
- PHIL 2360 Environmental Ethics (3 hours)
- An additional 6 credit hours of 2000+ level BIOL, CHEM or PHYS electives. No more than four (4) hours can be applied from independent research credits, including Independent Biology Research (BIOL 4700, 4710, 4720 and/or 4730) and Independent Chemistry Research (CHEM 4700, 4710, 4720 and/or 4730).

Emphasis in Bioinformatics (66 hours)

The emphasis in bioinformatics prepares students with a diverse scientific foundation in biology and computer languages, to prepare students for careers in bioinformatics that require data analysis skills, such as: biotechnology, academic research labs, medicinal chemistry, pharmaceuticals research, agriculture technology, personalized healthcare, or any biology-related field that involves data analysis.

Biology (BA)

Emphasis-Specific Learning Outcomes

In addition to the general learning outcomes, students who complete the emphasis in bioinformatics will be able to:
